

Rethinking the Bachelor's Degree: The Rise of the 90-Credit Model

THE DRIVING FORCES FOR CHANGE

Faster Careers, Less Debt

Students can enter fields like IT and healthcare faster with a lower financial burden.

Meeting Market Demand

Focused curricula can better align with skills that employers are actively seeking.

An Overdue Evolution

The 120-credit standard is decades old and needs re-evaluation for modern learners.

KEY INSTITUTIONAL HURDLES & QUESTIONS

Defining the Degree's Value

How will accreditation bodies, graduate programs, and employers view this new model?

Navigating Internal Politics

Institutions must manage faculty buy-in, shifting revenue models, and departmental impacts.

Ensuring Student & Financial Impact

Does this model truly improve persistence and financial outlook for students without jeopardizing financial aid?
